<i>Project №35: Construction, asphaltting and improvement of streets and reconstruction of the bridge over Bic river .....</i>	<i>73</i>

# Foreword

The main problem that should solve communities from Moldova relates to the lack of investment and capital in the productive sector and services. The need for foreign capital lies in the inability of local economies to solve the avalanche of local community issues. Capital requirements for economic recovery is enhanced also by the outdated and obsolete technologies, which are still widely used by business people from our localities. In fact, in most strategic plans for local development, Local Public Authorities (LPA's) of Chisinau municipal communities consider as fundamental priorities, the retechnologizing of existing enterprises and supporting the local producers. It is well known that foreign direct investments represent, as form and content, a manifestation of economic relations and international cooperation. The globalization of economic problems and of financial capital flows makes investing activities have an international character, with involvement of all actors from national economies. From this point of view, vis-à-vis of the investment process, is normal to appear common interests and, in some cases, divergences between businessmen. In this sense, is vital for municipal communities to attract investments and to direct them for achieving major goals as: efficient public services, local economic recovery, the improvement of small and medium enterprises (SMEs), etc.. Local authorities interested in attracting investments have to know exactly what to propose to investors. What are the comparative advantages? In our opinion, the municipal communities are advantaged by the:

- favorable geographical position and proximity to Chisinau;
- locality gasification in proportion of 80 - 100%;
- electrification in proportion of 100%;
- telephony in proportion of 90 - 100%;
- mobile and internet access to 100%;
- relatively good transport routes;
- closeness to the train station and Chisinau international airport;
- relatively cheap labor force;
- advanced intellectual potential of citizens;
- availability of local authorities to cooperate and to provide support to investors;
- position that crossroads the Eurasian trade routes.

But where is possible to invest? What are the priority areas? From this point of view we will highlight those areas that, in general, can change the socio-economic situation of communities:

- ecological agriculture;
- agriculture products processing;
- agrotourism;

- services and trade sector;
- a modern thermal isolation of public buildings;
- processing of domestic and bio-degradable waste;
- retechnologizing of SMEs;
- renewal of water supply and heating networks;
- building sector thermal power plants;
- renewable energy;
- creating centres and recreational areas;
- efficientization of public lighting;
- urban and inter-urban transport efficientization.

Some communities demonstrate that can attract investment in existing conditions and, in this way they solve some of the most pressing social-economic local problems. Almost in every locality can be identified examples of success: contemporary public institutions, renovated schools, paved roads, modern agriculture, civilized commerce, etc.. But, obviously, is much more to do.

Even if in this guide are not included inter-community projects, this doesn't mean that they can't be designed and developed. IDIS „Viitorul” always favored the inter-community cooperation, association of local authorities for efficient provision of public services, including modernization and rehabilitation of existing infrastructure.

The vision from our point of view facilitates and stimulates the attraction of international companies and investment funds necessary for modernization and Europeanization of Moldova.

The present guide aims to provide relevant information to potential investors about the possibility to invest in Chisinau municipal communities. This guide aims to be accessible to a broad enough audience, and also, to provide some ideas for investment projects that would interest the potential investors: private investors, foreign donors, specialized consultants, international companies, investment funds, etc..

Solving a significant local problem brings immediate positive effects as: the trust that everything can be done, the improvement of life quality, cultivating a sense of satisfaction, trust that things may get better. And this means a lot to all people of good faith.

<p><b>Period of project realization:</b> 3 years.</p>		<p><b>Profitability and efficiency of the project after completion:</b></p> <ol style="list-style-type: none"> <li>1) to ensure further functioning of public services in accordance with the requirements of ISO 9001-2000;</li> <li>2) renovation of the local infrastructure;</li> <li>3) involving all employees of the mayoralty in the improvement and continuous surveillance of the quality of administrative services.</li> </ol>

**Projects of Bacioi locality**

<b>Nr. 2</b>	<p><b>Name of project:</b>  <i>Creating a practical educational Center for the study of vegetation growth in greenhouse.</i></p>	<p><b>Type of project:</b>                  socio-economic</p>
<p><b>Brief description of project:</b></p> <p>Companies specialising in the production of pulses exists on the market, but their contribution to the fulfilment of the internal market is insignificant. Those specializing in vegetable production growth, which are not supported by the state hasn't financial resources and modern equipment in order to satisfy the local market with high quality products, competitive compared with those of import at the same time helping to show that the employment of thousands of professionals and skilled workers, thus forcing illegal emigration.</p> <p>At the same time, the commune has a Bacioi, logistic tools and human potential, a greenhouse, equipped with modern equipment for purchase with modest prices at first etwater supply by preparing and training professionals can only occur with a wide range of products, vegetables, early during the cold season in protected areas and indigenous market available to consumer products with low COGS as: onion, cabbage, tomatoes, peppers, courgettes, cauliflowers, cucumbers, carrot, beans, patrunjelul, red beets.</p> <p>According to calculations, the costs for preventive and development of these products will be lower due to reduced expenditure on transport, due to the fact that they are used in arablee land, provision for heating alternative sources are used, such as biomass, balotele, straw, who will be more attractive in terms of cost-factor important to the buyer along with modest financial sources of existence.</p> <p>Within the framework of this project is planned to be built, a complex of glasshouses with a total area of one hectare to 20 greenhouses each with an area of 450 sq.m, which will include:                  – system of irrigation by drip rails, determination of nutrients and micro-nutrients by irrigation system, heating system with the use of biomass.</p>		
<p><b>Expected result:</b></p> <ol style="list-style-type: none"> <li>1) creation of conditions of the vulnerable parts of society;</li> <li>2) creating premizelor of employment, employment by using modern applications of plant production in the protected areas;</li> <li>3) rational land resources and energy for the growth of vegetation and organic market consumer satisfaction;</li> <li>4) agro-industrial sector reanimation.</li> </ol>		<p><b>Beneficiaries:</b></p> <ol style="list-style-type: none"> <li>1) local population;</li> <li>2) economic agents in the locality;</li> <li>3) commercial companies;</li> <li>4) educational institutions;</li> <li>5) farmers.</li> </ol>
<p><b>Internal and external stakeholders interested in the implementation of project:</b></p> <ol style="list-style-type: none"> <li>1) local public administration of Chisinau;</li> <li>2) sponsors;</li> <li>3) economic agents;</li> <li>3) local and abroad partners;</li> <li>4) EVD International, CNFA.</li> </ol>		<p><b>Potential donors:</b></p> <ol style="list-style-type: none"> <li>1) sponsors;</li> <li>2) economic agents;</li> <li>3) local and extra-budgetary resources.</li> </ol>

<p><b>Prerequisites for the realization of project:</b></p> <ol style="list-style-type: none"> <li>1) providing population with pure domestic production quality;</li> <li>2) reduced expenses in respect of the provision on the Chisinau municipality of vegetal production to the buyer along with the marketing of fresh.</li> </ol>	<p><b>The risk factors relating to the implementation of project:</b></p> <ol style="list-style-type: none"> <li>1) restricted financial means;</li> <li>2) lack of experience in the organic growth of vegetation in protected areas;</li> <li>3) lack of investments;</li> <li>4) lack of state protection of the local manufacturers.</li> </ol>
<p><b>Financial sources necessary for the implementation of project:</b> 140 000 euro.</p>	
<p><b>Contact person:</b>  Sergiu Galitchi;  phone: 0-780-23-844;  e-mail: RITPMOLDOVA@mail.ru</p>	
<p><b>Period of project realization:</b> 12 months.</p>	<ol style="list-style-type: none"> <li>1) profitability and efficiency of the project after completion: 59%;</li> <li>2) yield management 87 6618,25 MDL is income after deducting variable costs and fixed;</li> <li>3) break-even harvest 37,8 t / 0,5 ha represents minimum harvest to cover all the expenses;</li> <li>4) break-even price 7,5 MDL/kg</li> </ol>

## Projects of Bacioi locality

<b>Nr. 3</b>	<b>Name of project:</b> « <i>Creating value for all: strategies for doing business with the poor</i> » (SDBP)	<b>Type of project:</b> socio-economic
<b>Brief description of project:</b> The organization of educational-training demonstration in terms of initiating a private business with the opening of a special account of microfinance and the creation of the Informational-Advisory Community Center «Multimedia».		
<b>Expected result:</b> 1) around 100 people will be trained; 2) will be created for 25 premises microfinance with the classification of persons on employment; 3) will be created Center «Multimedia»; 4) will be revived agro-industrial sector; 5) will be created a microfinance fund for the local population.		<b>Beneficiaries:</b> 1) local population; 2) economic agents in locality; 3) commercial companies; 4) educational institutions; 5) farmers; 6) representatives of the NGO.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration of Chisinau municipality; 2) sponsors; 3) economic agents; 3) local and abroad partners; 4) EVD International, CNFA.		<b>Potential donors:</b> 1) sponsors; 2) economic agents; 3) local and extra-budgetary resources.
<b>Prerequisites for the realization of project:</b> 1) interest of the local population in terms of staff training and preparation in accordance with modern requirements; 2) inexpensive workforce; 3) the consumer market is located in direct vicinity of the Chisinau municipality; 4) reduction of expenses for the placing on market of fresh plant products for consumers in Chisinau municipality.		<b>The risk factors relating to the implementation of project:</b> 1) restricted financial means; 2) lack of experience in the organic growth of vegetation in protected areas; 3) lack of investments; 4) lack of state protection of the local manufacturers.
<b>Financial sources necessary for the implementation of project:</b> 90 000 euro.		
<b>Contact person:</b> Sergiu Galițchi; phone: 0-780-23-844; e-mail: RITPMOLDOVA@mail.ru		
<b>Period of project realization:</b> 24 months.		<b>Profitability and efficiency of the project after completion:</b> ring of generation with innovative micro-finance projects, investment attraction.

<b>Nr. 4</b>	<b>Name of project:</b> <i>Construction of a preschool with 120 places in Bic village.</i>	<b>Type of project:</b> social
<p><b>Brief description of project:</b> Bubuieci consists of three villages: Bubuieci, Bic and Humulesti, the total population is about 9000 people. Bic village has a population about 2000 inhabitants, of which 200 children under school age. Some of these children are placed in preschool in Bubuieci village after a long period of programming. Other families educate children alone at home or are left to the relatives, neighbours, friends since preschool from Bubuieci village is overloaded. Because the capacity of existing preschools is small, they are replete with all the requests of parents to educate children in a preschool. The distance between Bic and Bubuieci village is approx. 3 km, as parents, relatives or neighbors of these families are forced to do a daily shuttle bus in the village of the construction of a preschool in the Bic village would solve the problem of uninstitutional children, would provide an education to children, parents living with fewer worries.</p>		
<p><b>Expected result:</b> 1) modern preschool; 2) powerful equipment; 3) professional teacher.</p>		<p><b>Beneficiaries:</b> 1) 120 children; 2) their parents.</p>
<p><b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration; 2) population of Bubuieci.</p>		<p><b>Potential donors:</b> 1) sponsors; 2) local public administration.</p>
<p><b>Prerequisites for the realization of project:</b> 1) 200 children is institutionalized and watched; 2) job vacancies.</p>		<p><b>The risk factors relating to the implementation of project:</b> 1) lack of financial means.</p>
<p><b>Financial sources necessary for the implementation of project:</b></p>		
<p><b>Contact person:</b> Saranuț Ion, Phone: 41-49-69</p>		
<p><b>Period of project realization:</b> 2011-2013</p>		<p><b>Profitability and efficiency of the project after completion:</b> The project will allow providing necessary conditions for the provision of preschool education for children from the locality. At the same time, parents will be able to fit into working environment more quickly where to leave your child with during the day.</p>

## Projects of Bubuieci locality

<b>Nr. 5</b>	<b>Name of project:</b> <i>Recreational area in Bubuieci village.</i>	<b>Type of project:</b> infrastructure
<b>Brief description of project:</b> In the Bubuieci village live over 9000 inhabitants. The city hasn't a park of rest for the inhabitants of particular of Bubuieci can spend time outdoors and clean. This project will be able to bring the inhabitants, but also to all visitors to Bubuieci positive emotions and possibilities to be able to recreate in a specially landscaped green space. Local public authorities has the territory to which could be placed this park but hasn't necessary financial resources.		
<b>Expected result:</b> The agreement will provide the population of Bubuieci village can spend leisure time in a particular place.		<b>Beneficiaries:</b> population of Bubuieci village.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration; 2) population of Bubuieci village.		<b>Potential donors:</b> 1) local public administration of Chisinau municipality; 2) RM Government; 3) foreign donors; 4) local public administration.
<b>Prerequisites for the realization of project:</b> over 9000 inhabitants will have the opportunity to rest and spend leisure time in a particular park.		<b>The risk factors relating to the implementation of project:</b> lack of financial means.
<b>Financial sources necessary for the implementation of project:</b>		
<b>Contact person:</b> Saranuț Ion, phone: 41-49-69		
<b>Period of project realization:</b> 2011-2015		<b>Profitability and efficiency of the project after completion:</b> this project will provide residents and visitors of Bubuieci particular green space for recreation and for practicing sports.

<b>Nr. 6</b>	<b>Name of project:</b> <i>Construction of a preschools with 80 places in Bubuieci village.</i>	<b>Type of project:</b> social
<p><b>Brief description of project:</b> The Bubuieci village has approx. 6800 inhabitants, of which 500 children under school age, of whom only 400 are divided into preschool nr.1, and nr.2, 100 children remain at home under the care of parents, grandparents or foreigners, has been institutionalized. The main cause being lack of places in preschool institutions. The construction of a new preschool institutions in Bubuieci village will ensure institutionalization of all of the village children, thus giving them the necessary training for school. Also, with the institutionalization of their children will always be supported from the people responsible and competent, professional. A positive consequence of the construction of the children will be preschools and the emergence of free time for parents, which will be able to include employment, ensuring a better life and prosperous family.</p>		
<p><b>Expected result:</b> 1) placement of children in preschool; 2) preparation of 100 school children for uninstitutionalization; 3) the advent of jobs for the workers and teaching techniques.</p>		<p><b>Beneficiaries:</b> 1) 100 children; 2) their parents; 3) employees (educators, kitchen workers, cleaners).</p>
<p><b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration; 2) children's parents.</p>		<p><b>Potential donors:</b> 1) sponsors; 2) local public administration.</p>
<p><b>Prerequisites for the realization of project:</b> 1) lack of places for children in existing preschools; 2) need for institutionalization of stay home children.</p>		<p><b>The risk factors relating to the implementation of project:</b> lack of financial means.</p>
<p><b>Financial sources necessary for the implementation of project:</b> 300 000 MDL</p>		
<p><b>Contact person:</b> Ion Saranuț, phone: 41-49-69</p>		
<p><b>Period of project realization:</b> 18 months.</p>		<p><b>Profitability and efficiency of the project after completion:</b> 100 children will benefit from the conditions necessary for the teaching process and will be prepared adequately for the school. Will be created about 12 job vacancies (educators, cooks). Parents can also fall in employment since during day children are at school and hasn't to sit with them at home.</p>

<p><b>Nr. 11</b></p>	<p><b>Name of project:</b> <i>Construction of a sewage system in the private sector in Ciorescu locality.</i></p>	<p><b>Type of project:</b> infrastructure</p>
<p><b>Brief description of project:</b> In Ciorescu today are around 2500 private houses, which entails the unconditional authority of the local public to organize and carry out local public services, which meet the needs of people with maximum efficiency. Thus, one of the priority problems in this area is to provide the population with a sewage system. This issue has been conditioned by the lack of financial and material resources, with consequent inconvenient population and has a negative effect on personal and public hygiene, morbidity with diseases gastrointestinal disorders. So, the stages of implementation of the project: - elaboration of a feasibility study; - drafting and registering; - carrying out tenders required the implementation of the project; - proper implementation; - evaluation of the results; - official opening.</p>		
<p><b>Expected result:</b> 1) sewage system with the 2500 individual houses; 2) provision of quality public services.</p>		<p><b>Beneficiaries:</b> 1) 3000 peoples in locality; 2) public administration.</p>
<p><b>Internal and external stakeholders interested in the implementation of project:</b> 1) population; 2) local public administration.</p>		<p><b>Potential donors:</b> 1) population; 2) local public administration; 3) economic agents in locality; 4) other resources.</p>
<p><b>Prerequisites for the realization of project:</b> lack of sewage system.</p>		<p><b>The risk factors relating to the implementation of project:</b> 1) lack of financial and material resources for the implementation of the project; 2) refusal of the beneficiaries to contribute to the implementation of the project.</p>
<p><b>Refinancial sources necessary for the implementation of project:</b> 50 mln. MDL</p>		
<p><b>Contact person:</b> Bostan Natalia, phone: 45-68-72, e-mail: primardeciorescu@mail.md</p>		
<p><b>Period of project realization:</b> 2012-2014</p>		<p><b>Profitability and efficiency of the project after completion:</b> Project will ensure people in the sector better living conditions. At the same time it will reduce considerably the risk of epidemics caused by the lack of sewerage systems.</p>

## Projects of Ciorescu locality

<b>Nr. 12</b>	<b>Name of project:</b> <i>Full renovation of the first town-historic buildings in Ciorescu locality – historic monuments, the School of the arts.</i>	<b>Type of project:</b> social
<b>Brief description of project:</b> <p>In 2011, the entire town lived moments, because we have the honor to celebrate the 100 years of the village. In 1911, was first cornerstone of the locality, as in the village of water supply Ciorescu with the building of the school of Agriculture, which today is the School of fine arts. This is the oldest building in town.</p> <p>Where today there are 250 children, studies in various fields of art, dance, music, theatre, and tools. In fact, the whole building was never fully repaired or reconstructed, precisely for these reasons, it is one of the issues on the agenda for local authorities.</p> <p>Thus, in the realization of this project is necessary:</p> <ul style="list-style-type: none"> <li>- feasibility study on the repair of the roof;</li> <li>- roof design (sketch design);</li> <li>- registration of the project profile institutions;</li> <li>- organization of tenders (on the roof);</li> <li>- repair activities of internal walls;</li> <li>- repair of the façade;</li> <li>- disseminating information;</li> <li>- organization of a concert for the official opening.</li> </ul>		
<b>Expected result:</b> 1) increasing the number of children who will frequent this institution to 600; 2) introduction of new sections for children, working in wood, folk crafts; 3) keeping traditions and national values; 4) organization of competitions at national level.		<b>Beneficiaries:</b> 1) 1064 children under the age of 16 years; 2) local public authority; 3) parents and grandparents of children who are frequent; 4) 100 children from neighbouring villages attending institution.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) population; 2) local public authority.		<b>Potential donors:</b> 1) population; 2) local public authority; 3) economic agents in locality; 4) other resources.
<b>Prerequisites for the realization of project:</b> 1) condition of the building; 2) increasing the number of children willing to study; 3) first edifice built in the city (historic monument)		<b>The risk factors relating to the implementation of project:</b> 1) lack of financial and material resources for the implementation of the project; 2) refusal of beneficiaries to contribute to the implementation of the project.
<b>ReFinancial sources necessary for the implementation of project:</b> 2 mln. MDL		
<b>Contact person:</b> Bostan Natalia, phone: 45-68-72, e-mail: primardecioreescu@mail.md		
<b>Period of project realization:</b> 2012-2013		<b>Profitability and efficiency of the project after completion:</b> Renovation of this historical monument is helping to develop the tourism potential of the locality.

<b>Nr. 15</b>	<b>Name of project:</b> <i>Construction of approved garbage dump in Condrîța village.</i>	<b>Type of project:</b> infrastructure
<b>Brief description of project:</b> This project involves the construction of a village on the territory of dumps, building completely missing in the territory of the village, which led to the accumulation of garbage in an unauthorized place commodity merchants, which in turn entails serious consequences such as: pollution of the territory and of groundwater in the direct vicinity of; injury to the physical appearance of the village etc. This project will be implemented through the Ministry of the environment with the support of its financial and methodological.		
<b>Expected result:</b> 1) better appearance of the city; 2) solve the problem of environmental pollution; 3) educating civil society and cultivation of a high level of social responsibility; 4) to set a timetable for the garbage collection through the village which will allow access to only a accumulation pit narrow circle of people which in turn will draw the keeping cleanness around groapei reservoir.		<b>Beneficiaries:</b> 1) inhabitants of Condrîța village (730 inhabitants); 2) members of Fruit Partnership «Condrîța»; 3) members of Fruit Partnership «Luminis»; 4) economic agents operating in the locality.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) inhabitants of Condrîța village (730 inhabitants); 2) members of Fruit Partnership «Condrîța»; 3) members of Fruit Partnership «Luminis»; 4) economic agents operating in the locality.		<b>Potential donors:</b> 1) Ministry of Environment; 2) budget of the municipality; 3) private resources.
<b>Prerequisites for the realization of project:</b> 1) lack of a particular place for collecting garbage in territory of the village; 2) environmental pollution; 3) groundwater pollution.		<b>The risk factors relating to the implementation of project:</b> 1) stop the project due to lack of funding; 2) delaying the execution of the project due to insufficient infrastructure of roads; 3) location of garbage dump on the outskirts of the city may entail a risk of pollution of the area near the garbage dump by the inhabitants of neighboring villages.
<b>The financial resources necessary for the implementation of project:</b> 10 000 euro		
<b>Contact person:</b> Alexei Bosneaga, phone: 79-78-40, e-mail: primaria.condrita@gmail.com		
<b>Period of project realization:</b> This project would be possible within ½ to 2 years, depending on the funding and executing company.		<b>Profitability and efficiency of the project after completion</b> This project will allow to avoid further pollution of the environment and will produce long-term positive effects, among them list creation and further development of infrastructure, the creation of a viable images of both the visitors and potential investors.

## Projects of Condrîța locality

<b>Nr. 16</b>	<b>Name of project:</b> <i>Creating a water supply system for irrigation in Condrîța village</i>	<b>Type of project:</b> infrastructure
<b>Brief description of project:</b> This project involves marking a pipe water for irrigated land for a number of households which is situated in direct proximity to the pond and in need of water for irrigated land. It would give us the possibility to attract additional sources in the local budget.		
<b>Expected result:</b> 1) recovery of land resources in the direct vicinity of the pond in the case; 2) raising productivity of crops grown in the territory concerned; 3) revenues in local budget.		<b>Beneficiaries:</b> 1) people who live near the pond; 2) people who practice the growing of vegetables in summer season in the village; 3) Mayoralty of Condrîța village, through increased local budget.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) people who practice the growing of vegetables in summer season in the village; 2) Mayoralty of Condrîța village.		<b>Potential donors:</b> 1) cetașenii cointeresați; 2) Mayoralty of Condrîța village.
<b>Prerequisites for the realization of project:</b> 1) unauthorised use by persons of the water in the pond (which is in public ownership); 2) introduction to vegetable culture near households in the territory; 3) identify new opportunities to attract local budget resources.		<b>The risk factors relating to the implementation of project:</b> 1) small number of potential beneficiaries and taxpayers; 2) seasonal service (preferential agricultural-crops, including vegetables in greenhouse, usually 4-5 months).
<b>The financial resources necessary for the implementation of project:</b> Amount: about 10 000 MDL, from which to the Mayoralty contributes to 40% and the remaining amount of the stay on account of taxpayers (originally, 5 to number).		
<b>Contact person:</b> Bosneaga Alexei, phone: 00 (373 22) 79-78-40, e-mail: alexei.bosneaga@gmail.com		
<b>Period of project realization:</b> duration of this project: from 2 weeks to 1 month (involve NPGA and the digging of the țevineyards from the pond to the beneficiaries in the ground).		<b>Profitability and efficiency of the project after completion:</b> $R_f = (3750/4000) \times 100\% = 93.75\%$ So it follows that every unit (leu) invested in this project, we get 0.9375 MDL, which would allow us to do another rascumparam investments and profits in the first two years after the implementation of the project.

<b>Nr. 17</b>	<b>Name of project:</b> <i>Construction of a school in Condrîța village.</i>	<b>Type of project:</b> infrastructure
<b>Brief description of project:</b> The project envisages the construction of a school of small capacity (up to 140 students), equipped with a Sports Hall, sport grounds near the school. In other words, the construction of a school of well equipped technically and allowing providing necessary conditions for both teachers and students. At the moment in the town as a headquarters of the medical school serves point.		
<b>Expected result:</b> 1) create the conditions necessary for the provision of high quality studies; 2) possibility of multilateral children sport exercises and education; 3) creation of conditions of work necessary to attract qualified teachers; 4) efficiency of education and cultural life in Condrîța village.		<b>Beneficiaries:</b> 1) children in locality; 2) children of workers of I.P. «Condrîța» si I.P. «Luminis»; 3) teachers and technical personnel (by keeping jobs).
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) inhabitants of the village(730 locuitori); 2) people of I.P. «Condrîța»; 3) people of I.P. «Luminis».		<b>Potential donors:</b> 1) MSIF; 2) budget of the municipality; 3) own sources; 4) other potential financial sources.
<b>Prerequisites for the realization of project:</b> 1) lack of basic conditions for the carrying out of studies in the school; 2) inefficient heating of the building of the school; 3) lack of school library; 4) the school isn't equipped with sports halls which prevents student to attend physical education classes during the winter; 5) the school isn't equipped with the banquet hall and which computers are still an obstacle in regards to ensure qualitative studies and students with modern conditions.		<b>The risk factors relating to the implementation of project:</b> 1) lack of donations; 2) we can fall under acting of the National Strategy on Decentralization and financial autonomy of schools.
<b>The financial resources necessary for the implementation of project:</b> approx. 20 mln. MDL		
<b>Contact person:</b> Bosneaga Alexei, phone: 79-78-40, e-mail: alexei.bosneaga@gmail.com		
<b>Period of project realization:</b> 2 years.		<b>Profitability and efficiency of the project after completion:</b> The construction of a school of well equipped technically will allow providing necessary conditions for both teachers and students. This will provide better conditions for the conduct of teaching process which will be reflected on the development of spiritual and intellectual children. At the same time, teachers will benefit from better working conditions.

## Projects of Singera locality

<b>Nr. 28</b>	<b>Name of project:</b> <i>Construction of a Waste Sorting Station.</i>	<b>Type of project:</b> infrastructure
<b>Brief description of project:</b> Aim of the project is the development and upgrading of environmental infrastructure in the field of waste management with a view to increasing the degree of recycling and recovery of waste, to improve the level of protection of the environment and reduce risks to public health. Through the implementation of this project aims to develop a system of separate collection of waste and arranging a sorting stations for area of Singera town. It's proposed the construction of separate collection and sorting stations, purchase of containers for selective waste collection, a autocompactoare, as well as the final sorting equipment for waste sorting station.		
<b>Expected result:</b> 1) realization of full, effective and sustainable waste management in Singera; 2) protecting the environment; 3) increase of the quality of life; 4) economic development; 5) social and material benefits.		<b>Beneficiaries:</b> 1) townspeople (15 000 people); 2) economic agents; 3) school children; 4) preschool children; 5) public institutions.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration; 2) national and international sponsors.		<b>Potential donors:</b> financial sources for lack design and construction station sorting
<b>Prerequisites for the realization of project:</b> 1) lack of waste sorting stations in Singera locality; 2) increase the number of unauthorised dumps; 3) massive pastures pollution; 4) risk of the increase of infectious diseases.		<b>The risk factors relating to the implementation of project:</b> lack of financial resources for design and construction of sorting station.
<b>Financial sources necessary for the implementation of project:</b> 200 000 euro		
<b>Contact person:</b> Valeriu Poiata, mayor (primar) of Singera, phone: +373 22 41-30-41, e-mail: primaria_sangera@yahoo.com, primariasingera@yahoo.com		
<b>Period of project realization:</b> Project will be carried out in stages depending on the possibility of financing.		<b>Profitability and efficiency of the project after completion:</b> 1. liquidation of unauthorized dumps; 2. improvement of local situation; 3. processing a port of garbage coming from Chisinau and for other municipal localities; 4. will be created new jobs.

<p><b>Nr. 29</b></p>	<p><b>Name of project:</b> <i>Construction of a Golf Club</i></p>	<p><b>Type of project:</b> economic</p>
<p><b>Brief description of project:</b> Golf is one of the most loved sports of politicians and businessmen, but also persons who have the time, and money necessary to disconnect and relax, practice sports, the skill and patience in the midst of an oasis of greenery. Often regarded as an exclusive sports, the game of golf goes on to State as a national sport in countries like the Netherlands, Sweden, US. Although it looks very simple: «Let's go ball from start (tee) to destination (green) in as few shots» gulf of fast-growing dependence on anyone who makes time to try a «swing» (the correct movement by which send the ball away and law). This sport is popular in America and Western countries. In recent years there has been a great increase in Republic of Moldova and amateur golf. Through this project, the local public administration singera offers a reasonable total land for the construction of a golf course, clubhouse and other structures. The whole project is expected on a surface of approx.20-30 ha, located just 20 miles from the capital of Moldova. Because the game of golf is practiced by people who crave so much peace, who want to retreat from a stressful environment and want to have a minimum of comfort, it will be possible to organize golf competitions, in which weekends will take part in stars, politicians, businessmen and artists.</p>		
<p><b>Expected result:</b> 1) tourism development; 2) business development; 3) creation of new job vacancies; 4) investment attraction.</p>		<p><b>Beneficiaries:</b> this kind of sports enthusiasts in the country and abroad.</p>
<p><b>Internal and external stakeholders interested in the implementation of project .</b> 1) local public administration; 2) golf enthusiasts.</p>		<p><b>Potential donors</b> 1) local budget; 2) international sponsors; 3) partnerships.</p>
<p><b>Prerequisites for the realization of project:</b> absence of such Golf Club.</p>		<p><b>The risk factors relating to the implementation of project:</b> lack of financial resources for the design and construction of the Golf Club.</p>
<p><b>Financial sources necessary for the implementation of project:</b></p>		
<p><b>Contact person:</b> Valeriu Poiata, phone: +373 22 41-30-41, e-mail: primaria_sangera@yahoo.com, primariasingera@yahoo.com</p>		
<p><b>Period of project realization:</b> project will be carried out in stages depending on the possibility of financing.</p>		<p><b>Profitability and efficiency of the project after completion:</b> 1. golf amateurs from the country and abroad will benefit of the services of this kind of club: foreign beneficiaries will access the same services at a lower price like those from Spain for e.g.; 2. will be created new job.</p>

## Projects of Vadul-lui-Voda town

<b>Nr. 33</b>	<b>Name of project:</b> <i>Promotion of tourism in Vadul-lui-Voda town.</i>	<b>Type of project:</b> economic
<b>Brief description of project:</b> Vadul-lui-Voda town in Chisinau municipality has an advantageous geographical location. It is located between the town and plain of the lower Dniester terraced, surrounded by park leader. In addition, it has a very rich history, being founded in the medieval period. Having an infrastructure exemplary for our country with lots of tourist attractions, has a great opportunity for the development of tourism.		
<b>Expected result:</b> 1) development of a unique travel route; 2) attracting national and international tourists; 3) preparation of specialists in tourism; 4) promotion of eco- and rural tourism; 5) creation of conditions for youth rest and leisure; 6) will be promoted image of the town.		<b>Beneficiaries:</b> 1) students at Faculties of Tourism; 2) tourists in the country; 3) abroad tourists; 4) students in the country and abroad; 5) young people in the town.
<b>Internal and external stakeholders interested in the implementation of project:</b> 1) local public administration; 2) local public administration mun. Chisinau; 3) Departamentul Național de turism 4) universitațile din țara; 5) RM Government.		<b>Potential donors:</b> 1) local public administration of Vadul-lui-Voda town; 2) local public administration of Chisinau municipality; 3) RM Government; 4) foreign donors; 5) National Agency of Tourism.
<b>Prerequisites for the realization of project:</b> 1) absence of local accommodation of guests of the town; 2) need for training of tourism specialists; 3) need for development of tourism; 4) need for quality services; 5) need to promote youth.		<b>The risk factors relating to the implementation of project:</b> 1) lack of financial means suficiente; 2) lack of support from the municipal administration; 3) lack of support from the Government RM; 4) difficulties of coordination between different institutions; 5) restrictive bureaucracy in the country.
<b>The financial resources necessary for the implementation of project:</b> 20 000 euro		
<b>Contact person:</b> Natalia Lungu, phone: 00 (373 22) 41-12-75, e-mail: postaapl@mail.md		
<b>Period of project realization:</b> 2011–2014		<b>Profitability and efficiency of the project after completion:</b> After the implementation of the project profitability will be 100%, which will build the local economy development, halting migration and promoting all of tourism, as a branch of the local economy.
