Foreword

The Institute for Development and Social Initiatives (IDIS) “Viitorul” seeks, and we believe succeeds, to create a fertile environment for generating new and innovative ideas, always trying to answer to the most pressing challenges faced by Moldova in the process of European integration. In this endeavor, IDIS “Viitorul” continues to fulfill its ultimate mission in supporting political, economic and social development of the country through research and innovation, offering concrete recommendations and bringing solutions for the development and harmonization of national policies to the guiding European principles and benchmarks, contributing in this way to further European integration of the country. We believe that creativity and resourcefulness requires long-term commitments in order to have a positive and visible impact on the evolution of the Moldovan society. Any young talented, educated, resourceful person, who is also a team player, has the occasion to become a part of IDIS, all matters for this is to be aware about the Institute’s mission, to be able to work selflessly,

creating bold ideas and fighting for their achievement.

An encouraging fact is the increased number of young researchers who have joined IDIS “Viitorul” and developed serious studies that prove our commitment to support younger generation interested in policy research. Despite the critics addressed to some of our publications, –IDIS has shown a strong desire to identify viable solutions to many problems of Moldovan society. At the same time, in its activity, our institute is following the socio-economic priorities of Moldova.

The pressure of deadlines, which is an indispensable component of our life, is a test of both physical and intellectual strength challenging our creativity and resourcefulness. We firmly believe that the most innovative teams are those in which there is full trust in communication and discussion of ideas. In this context, IDIS „Viitorul” initiative is trying to create best environment and offers freedom of initiative for each component of the team which

can freely express its opinion about the socio-political processes in our society.

IDIS „Viitorul” has become a constant presence by its policy analyses, covering the whole variety of forms and structures (policy briefs, policy discussions, policy studies, policy notes). IDIS “Viitorul” Policy Studies Series presents in-depth analysis and critical reflections of IDIS researchers and associated experts taking viable approaches and solutions on the topic of political parties, foreign policy, EU integration, economy and agriculture development, regional development, public administration, energy security, education and many others. Also, it is noteworthy that, while conducting policy research, IDIS has developed several new areas of essential importance for the Republic of Moldova, such as early warning crisis monitoring, media, migration, and healthcare. Policy briefs are a special research instrument, which has not been anticipated before, however provides short, policy-oriented analyses and recommendations to policy initiatives or important political decisions. Also, the 2010 IDIS Catalog of Publications presents all the issues of several well-known and respected IDIS permanent products, such

as Economic Quarterly Statewatch, Social Monitor and Moldova Foreign Policy Statewatch. These policy instruments are excellent tools for sectoral monitoring of phenomena evolution with targeted recommendations. An innovative product: Early Warning Report was launched in 2010 and aims at observing, predicting and preventing, via recommendations, latent crises in various fields. In 2011 IDIS “Viitorul” anticipates to continue using its current research instruments and diversify them in order to respond to the country development challenges.

2010 IDIS Catalog of Publications is a brief review of publications produced by our institute in 2010 and we hope that this will be a useful material for all professionals dedicated to research, as well as to all relevant actors like local and central authorities, decision makers, political parties, development partners, media, academia and all those interested in development and European perspectives of our country.
